EDUCATION

University of Washington, Seattle   *Graduation: June 2025*
Bachelor of Science, Informatics

Relevant Coursework: Intro to Computer Science Series, UX Design Methods, Data Structures and Algorithms, Data Science Foundations, Product and Information Systems Management

TOOLS

		HARD SKILLS	SOFT SKILLS	
Java	Microsoft Office	Object-Oriented Programming	Teamwork	Time Management
Figma	Swift + SwiftUI	Front-End Development	Initiative	Problem Solving
MySQL	Javascript	Data Structures + Algorithms	Leadership	Communication
XML	HTML & CSS	User Research + Testing	Organization	Adaptability
R + R Shiny	Altair Monarch	Project Planning	Empathy	Critical Thinking
Power BI	Tableau	Human-Centered Design	Creativity	Ambition

WORK

Amazon Software Development Engineer Intern | Seattle, WA   *July 2024 – September 2024*
- Conducted **user research** and implemented an improved front-end macOS application with **Swift**
- Designed a guided walkthrough with **Figma** to cover all functions within the application
- Implemented a guided walkthrough for new and existing users to cover all functionality and top user pain points
- Enhanced user experience by integrating additional features such as refresh buttons, modifying device names, and adjusting app layout
- Based on user research, adjusted app dialogues that caused user pains accordingly

IT Audit Intern @ Washington State Auditor's Office **|** Remote   *June 2023 – June 2024*
- Performed Computer Assisted Audit Tests (CAATS), created data processing packages, updated complex databases, developed data analysis reports, communicated with entity staff
- Extracted extensive financial data from PDF using **Altair Monarch** and **Regular Expression**
- Created data visualizations of financial data trends using **Power BI**
- Executes routine data analysis and data cleaning in **Excel**

EXPERIENCE

Teaching Assistant: Product and Information Systems Management @ UW | Seattle, WA   *Sept 2024 – March 2025*
- Preparing and running lab sections for Produce and Informations Systems Management (INFO380)
- Taught one class of 35 weekly, conducting weekly standup and teaching class materials
- Attending lectures and grading classwork and project deliverables

Web Development: Closetify   *March 2024 – June 2024*
Link: https://tinyurl.com/closetify
- Created an app that allows users to manage a virtual wardrobe, edit outfits, and save them
- Web application built with JavaScript, React, and CSS – utilizes Firebase for authentication, cloud storage, and real-time data

UX Design: Humus   *Jan 2024 – March 2024*
Link: https://tinyurl.com/humusdesignchallenge
- App prototype for a cyclic composting collective, targeting homes in the U-District
- Completed a design sprint (understanding the issue, conducting user research, brainstorming, and wireframing)
- Created a final prototype in Figma

Women in Informatics (WINFO) Director of Event Operations   *March 2024 – March 2025*
- Orchestrates the planning, promotion, budgeting, and execution of 2-3 events per month
- Events range from fundraising to professional workshops and recruitment panels, to community-fostering events
- Collaborates externally with companies to host professional events
- Develops detailed project plans, defines the scope of each project, leads weekly team meetings, and delegates tasks to team members
